DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 19, 2007 has been entered.

Claim Objections

2. **Claim 2** is objected to for the following: 'the wafer' lacks antecedent basis. Examiner suggests using -a wafer-. Correction is required.
3. **Claim 3** is objected to for the following: 'the standard data' and 'the wafer' lack antecedent basis. Examiner suggests using -the data- and -a wafer- respectively. Corrections required.
4. **Claim 4** is objected to for the following: 'stored in analog' should read -stored as an analog-. Correction is required.
5. **Claim 5** is objected to for the following: 'the region' lacks antecedent basis. Examiner suggests using -a region-. Correction is required.
6. **Claim 7** is objected to for the following: on line 8 'correlating an optical image' should read -correlating the optical image-. Correction is required.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2877

8. **Claim 7** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As for **claim 7**, on line 8 the 'correlating an optical image' step is indefinite, for it is unclear to what the optical image is being related/being correlated. And in view of the correlating step of line 11 it is unclear as to what additional relation is being made.

Allowable Subject Matter

9. **Claims 1 and 6** are allowed.

Claims 2-5 would be allowable if rewritten to overcome the objections above.

As to **claim 1**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in a method for inspecting an insulating layer the particular creating and identifying steps, in combination with the rest of the limitations of **claims 1-5**.

As to **claim 6**, the prior art of record, taken alone or in combination, fails to disclose or render obvious in a method for inspecting an insulating layer the particular creating and identifying steps, in combination with the rest of the limitations of **claim 6**.

Due to the indefinite nature of **claim 7**, Examiner will not indicate allowable subject matter for this claim.

Response to Arguments

10. Applicant's arguments, see Remarks (pages 5-8), filed July 19, 2007, with respect to the previous rejections under 35 U.S.C. 101, 112 second paragraph, and 103(a) (see action: 20070414) have been fully considered and are persuasive. Due to the persuasiveness of the arguments and the amendment to the claims the previous rejections to **claims 1-7** have been

Art Unit: 2877

withdrawn. However, due to the amendment to **claim 7** a new ground of rejection has been made. See above.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure: U.S. Patent 5,436,725 to Ledger

U.S. Patent 6,753,972 to Hirose et al.

U.S. 2005/0046850 A1 to Chow
